

SIMPLIFIED AND SUCCESSFUL ENDODONTICS

ALL DAY HANDS-ON COURSE

This one-day course, as well as introducing participants to current nickel titanium rotary and reciprocal preparation and obturation, will cover diagnostic issues, digital 2D and 3D imaging, access cavity preparation and modern obturation. The course, limited to 10 participants, will take place in our "in-house" learning facility. Each participant will have their own work station equipped with an Endodontic motor and all files and endodontic equipment necessary will be supplied. To maximise the benefits for this course it would be helpful if you could bring three accessed molar teeth.

Dani Mancuso

BDS MSc PhD

Specialist Endodontist & Prosthodontist

Chris Emery

BDS MSc MRD MGDS FDS

Specialist Endodontist

Dani and Chris work together at the Specialist Endodontic Centre in Southsea. As they both have clinical and academic backgrounds and have run many courses in the past, an extensive postgraduate development has taken place in the practice. They are particularly proud of their new "in-house" postgraduate facility where they are now offering many courses, including study clubs, seminars and hands-on courses.
