Title

Can a tooth with root resorption be saved?

Aims and Objectives

This interactive lecture will demonstrate through clinical cases detailed knowledge and understanding when assessing the restorability of teeth. It will include the following subject areas:

- Diagnosis of root resorption.
- Understand the difference between internal and external resorptions.
- Treatment options for root resorption.

Intended Learning Outcome

By the end of the lecture, delegates should be able to identify the status of a root resorption to avoid unnecessary extractions.

Venue

Free Webinar

Date and time

Wednesday 03th of November 2021

6pm - 7pm

CPD

This course meets the criteria to meet the GDC verifiable eCPD Development Outcome A,B,C,D for 1 hour.

Dani qualified from University of Sao Paulo State in Brazil in 2002, where she was awarded the prestigious Maillefer Honours and Distinction Endodontic Award. She then enrolled into an extensive postgraduate program receiving her Masters Degree, PhD and PostDoctoral and became specialist endodontist and prosthodontist in both countries.

Dani worked as a Clinical Lecturer at Barts and The London Hospital Dental Institute in London, as an Associate Clinical Teacher at the University of Warwick and is nowadays an Invited Professor at University of Sao Paulo State in Brazil. She also lectures both nationally and internationally and provides in house postgraduate endodontic courses.

Outside of the office Dani enjoys spending time with her husband, two children and two cats. Her other passions are travelling, piano and classical ballet
