

SIMPLIFIED & SUCCESSFUL ENDODONTICS

ALL DAY HANDS-ON COURSE

Dani Mancuso

*BDS MSc PhD PostDoc
Specialist Endodontist & Prosthodontist*

Chris Emery

*BDS MSc MRD MGDS FDS
Specialist Endodontist*

Dani and Chris work together at the Specialist Endodontic Centre in Portsmouth. As they both have clinical and academic backgrounds and have run many courses in the past, an extensive postgraduate development has taken place in the practice.

They are particularly proud of their 'in-house' postgraduate facility where they offer many courses, including study clubs, seminars and hands-on courses.

AIMS AND OBJECTIVES

This one-day course, as well as introducing participants to current rotary nickel titanium continuous and reciprocal preparation, will cover diagnostic issues, digital 2D and 3D imaging, access cavity preparation and modern obturation. The course, limited to 10 participants, will take place in our "in-house" learning facility and each participant will have their own workstation. To maximise the benefits for this course it would be helpful if you could bring three accessed molar teeth.

INTENDED LEARNING OUTCOME

By the end of the course, delegates should be familiar with both rotary systems, understand their difficulties during the access cavity preparation and be comfortable with single cone obturation.

COURSE PROGRAMME

9.00am	Registration and Coffee
9.15am	Lecture
10.15am	Demonstration using operating microscope
10.30am	Coffee
10.45am	Hands-on
