

Cases Study

Speaker Vanderley da Silva

BDS Specialist Endodontist (Brazil), Practice Limited to Endodontics

Vanderley da Silva
BDS Specialist Endodontist (Brazil)
Practice Limited to Endodontics

Title

Avoid the unnecessary extraction and save the tooth!

Aims and Objectives

This interactive lecture will demonstrate through clinical cases detailed knowledge and understanding of the questionable cases involving cracks, resorption, posts, difficult anatomy and other challenges in our daily routine to enhance the treatment planning.

Intended Learning Outcome

By the end of the lecture, delegates should be able to assess the best way to diagnose and to treatment plan their cases to avoid unnecessary extractions.

Venue

Free Webinar

Date and time

Thursday 16th June 2022

6:30pm - 7:30pm

CPD

This course meets the criteria to meet the GDC verifiable eCPD Development Outcome A,B,C,D for 1 hour.

Vanderley qualified as a dentist in Brazil in 2001. Following his passion for Endodontics, he enrolled into an extensive postgraduate program at the most prestigious university in the country, University of Sao Paulo (USP), becoming a Specialist Endodontist in Brazil.

He has been working in the United Kingdom since 2012, limiting his practice to Endodontic referrals and postgraduate teaching. Vanderley is always up to date with new research and innovation in the field of Endodontics. He believes in the minimally invasive practice of dentistry and makes a great effort to keep his patients relaxed and at ease during their visit.

He is a keen cyclist, attends the gym regularly, and enjoys swimming and scuba diving. He speaks Spanish, Portuguese and English and is a member of the British Endodontic Society.
